ABOUT ME

I am a front-end developer who enjoys coding with empathy and finding beautiful solutions for accessibility problems. Having studied in Advertising and then worked in Photography, I have experience performing in teams, committing to deadlines, and handling myself under pressure. In my spare time, when I'm not learning new coding languages like React Native and PHP, I'm most likely exercising at the gym or feeding squirrels at the park.

FEATURED PROJECTS

HOUSEPLANT KILLER CONFESSIONS

HTML5, CSS3, React, Firebase, RESTful APIs
- This application allows houseplant killers to confess their bontaical guilt and share it on a comment wall
